

Appointment of NOSSP Project Director

Fin Resources Limited (ASX: FIN) (Fin or the Company) is pleased to advise that it has employed Mr James Barrie as its full-time project director for the North Onslow Solar Salt Project (NOSSP).

Mr Barrie has more than 35 years' experience in leadership roles for salt, iron ore and other projects with numerous Western Australian engineering and mining companies. With an MBA from Curtin University, UK chartered in mechanical and electrical engineering and as a qualified and experienced project management professional, he is ideally suited to lead the commercial and technical facets of the NOSSP which includes salt, energy and renewables products.

Mr Barrie's recent roles included as Worley's Project Director for Rio Tinto's \$4.5bn Gudai-Darri Phase 2 Iron Ore Project (PFS Stage) and Straits Resources and PTT Asia Pacific Mining's Project Director for the Yannarie Solar Salt project in the Exmouth Gulf, the world's largest solar salt field (now being developed by the K+S Group as the Ashburton Solar Salt Project).

He also has substantial port development and construction experience including BHP's Tug harbour at Port Hedland, York Potash's Port in the UK, Saudi Aramco's King Salman Shipyard and the Royal Saudi Navy Forces Dockyard Expansion in Jubail.

Fin Resources Director Jason Bontempo commented:

"James is a significant and critical addition to the management team at Fin Resources for the advancement and development of the NOSSP. James' extensive experience with Solar Salt has allowed him to hit the ground running and we look forward to the delivery of the updated NOSSP Scoping Study expected in the 3rd Quarter 2021."

About Fin Resources

Fin Resources Limited is an ASX listed company (ASX:FIN) focussed on the development of the North Onslow Solar Salt Project (NOSSP). The NOSSP consists of six exploration licences totalling 425 km² located in a proven salt production region with ideal climatic conditions to produce high purity salt. The Company is investigating the use of renewable energy in the form of wind and solar energy to create a zero-carbon footprint project and potentially fuel renewable product streams like Hydrogen and other green by products.
